AERODYNAMICS

AIRCRAFT DESIGN AND CONSTRUCTION

AVIONICS AND SYSTEMS

GUIDED FLIGHT

HISTORICAL

PILOTING

A welcome new edition of Horatio Barber’s The Aeroplane Speaks — originally published in 1917 — an early piloting manual which discussed basic flying principles, cross-country flying, stability and control, rigging, propellers and maintenance and concludes with a glossary of terms.

PROPULSION

MATHEMATICS AND DYNAMICS

MANAGEMENT

SERVICE AVIATION

Incorporating the recollections of many who were involved, this book vividly describes the W22 air operations of the US Eighth Air Force using the B-17 Flying Fortress and B-24 Liberator.
